Remote · Open to relocation

PROFESSIONAL SUMMARY

Systems Engineer with 7+ years building scalable web apps for enterprise B2B clients. Currently a Senior Frontend Developer on a North American wholesale e-commerce platform (Next.js, TypeScript, CMS + commerce APIs). Previously led frontend architecture, team standards, and modernization initiatives; comfortable owning decisions end-to-end across React and Node / .NET

PROFESSIONAL EXPERIENCE

Senior Frontend Developer (Contractor) · *Smith*

United States, Remote · Apr 2026 – Sep 2026

- Building the customer-facing storefront of a large-scale B2B wholesale e-commerce platform for the U.S. and Canada, on a Next.js 15 / React 19 / TypeScript monorepo with a BFF over Azure Functions, Contentstack CMS.
- Shipped product, cart, and checkout flows (PDP buy box, guest vs authenticated purchase, shipping restrictions, place-order error handling) integrating commerce APIs with React Query and Zustand.
- Delivered account features including saved lists (search, sort, line totals) and order-detail views, aligning frontend contracts with mid-tier APIs.
- Implemented storefront pages from Figma into production UI using design tokens and Tailwind, keeping visual fidelity across desktop and mobile.
- Improved delivery speed by building AI-assisted workflows (Jira + Figma → typed components, mocks, and stories) used to scaffold storefront pages consistently.

Stack: React 19 · Next.js 15 · TypeScript · Tailwind CSS · Zustand · TanStack Query · Contentstack · Azure Functions · Figma · Jira · Cursor · Claude Code · Datadog

Frontend Development Lead · *Celuweb.com S.A.S.*

Armenia, Colombia · Mar 2022 – Nov 2025

- Defined frontend architecture standards and led technical decision-making across the team, including technology evaluation, migration strategies, and code review processes to ensure consistency and long-term maintainability.
- Led frontend architecture with React 17, Next.js 15 (SSR/SSG) and TypeScript; migrated state management from Redux Toolkit to Zustand, reducing complexity and improving team scalability.
- Built Drag & Drop Survey Generator with conditional logic and real-time preview, enabling non-technical users to create complex forms independently.
- Developed Dynamic Reporting System with ECharts for high-volume data visualization across tables, charts, and maps, delivering actionable business insights.
- Integrated .NET Core 6 backends with optimized API and SQL Server queries, improving overall system responsiveness.

Stack: React.js · Next.js 15 · TypeScript · Zustand · React Query · Ant Design · Tailwind CSS · ECharts · .NET Core · C# · SQL Server

Solutions Consultant III · *Sophos Solutions*

Medellín, Colombia · May 2021 – Mar 2022

- Built full-stack credit eligibility system for Banco Popular, integrating RESTful APIs with repository pattern and Entity Framework Core.
- Implemented HealthChecker service enabling proactive monitoring of service availability and performance metrics.

Stack: Angular · TypeScript · Tailwind CSS · .NET Core 5 · C# · SQL Server

Web Application Developer · *Celuweb.com S.A.S.*
Medellín, Colombia · Jun 2018 – Apr 2021

- Delivered enterprise B2B web applications for major Colombian consumer brands including Postobón, Nutresa, Ramo, and Alquería.
- Led frontend modernization initiative, migrating legacy .NET WebForms to Vue.js and React.js, reducing technical debt and improving developer experience.
- Managed SQL Server databases including stored procedures, query optimization, and ETL processes supporting critical business operations.

Stack: ASPX · React.js · Vue.js · JavaScript · .NET framework · C# · VB · SQL Server · SQLite
